

### **Meeting the demand of partner countries for developing digital services**

ADETEF, consultant and operator in international technical assistance of the French Ministries of the Economy and Finance, created a digital economy pool of experts in 2007. Its aim was to meet the demand of foreign governments and international donors in a range of fields:

*- Legal and programmatic framework of telecommunications*

Regulatory framework, regulation, nationwide digital planning and development, frequency plans, etc.

*- E-administration*

Governance, citizens' portals, e-procedures, IT systems in Ministries, etc.

*- Financial services*

Secure online and/or mobile phone-based payment

*- Strengthening the economic fabric*

Development of ICT sectors and businesses, creation of technology parks, e-business to foster enterprise growth, etc.

### **Our know-how:**

#### ***Project development & management***

Adetef has recognized experience in the development and financing of multilateral technical assistance projects for partner countries. Through an approach based on preliminary diagnosis, Adetef designs solutions tailored to the specifics of each project.

### **Our strengths:**

#### *Cutting-edge expertise*

- A pool of top-tier, internationally renowned experts from the public and private sectors, capable of dealing with the diversity of issues surrounding the digital economy;
- The international experience of a public agency providing technical expertise across the economic and financial spectrum.

#### *A network of partners*

ADETEF's digital economy pool of experts is the driving force behind Club Exportic, a vehicle for transferring cutting-edge know-how.

Grouping together more than 700 experts from France's most dynamic ICT companies, Club Exportic partners with European networks of expertise.

## We have earned their trust

### Legal and programmatic framework of telecommunications

The Arab Maghreb Union, for harmonization of its telecom and ICT regulations, with the African Development Bank and law firm Bird & Bird.

### E-administration

The European Commission (DG Information Society and Media - INFISO), in the framework of the PEPPOL consortium ([www.peppol.eu](http://www.peppol.eu)), to make EU-wide public e-procurement interoperable.

### Computing, multimedia, and the Internet

The Ministry of Foreign Affairs, for the creation of a prototype economic portal for the French-speaking world ([www.francophonie-economique.org](http://www.francophonie-economique.org)).  
The Sophia Antipolis Foundation, for the portal of its Euro-Med Innovation Network ([www.rie-ein.eu](http://www.rie-ein.eu)).

### Financial services

The «Secure Electronic Transactions» competitiveness cluster ([www.pole-tes.com](http://www.pole-tes.com)), to help its member companies join international consortia, particularly in online and mobile phone-based payment.

### ICT and economic growth

The European Commission (DG Enterprise and Industry - ENTR), to compile and disseminate best e-business practices of European SMEs in 23 languages ([www.epme.eu](http://www.epme.eu)).  
The Algerian Ministry of Industry, for ICT support to help develop the country's industry (2008).
